WORK EXPERIENCE

FIDDLEHEAD FARM & FOREST | Fletcher, NC

03/2025 - 03/2026

Fiddlehead Farm & Forest is a community-focused climbing gym, bike park, and fitness facility offering youth programs, events, and year-round recreation.

General Manager | Full-time

- Led day-to-day operations across all departments, including climbing, bike park, café, fitness, retail, and youth programming, ensuring safe, consistent, and high-quality experiences for members and guests.
- Built and refined operational systems for scheduling, payroll, budgeting, and documentation, improving clarity, accountability, and cross-department coordination.
- Managed financial planning and forecasting, including departmental budgets, contribution analysis, and scenario modeling to support sustainable growth and cost control.
- Oversaw hiring, onboarding, training, and performance management for staff across multiple roles, fostering a collaborative, supportive, and safety-focused team culture.
- Partnered with program leads and coaches to design, launch, and iterate youth programs, camps, clubs, and teams, balancing community impact with operational sustainability.
- Coordinated facility operations, risk management, and compliance, maintaining safety standards and responding effectively to weather events, incidents, and operational disruptions.

- Collaborated with ownership, vendors, and community partners to support events, partnerships, and long-term strategic planning.

EBSCO INFORMATION SERVICES | Ipswich, MA

10/2010 - 09/2024

EBSCO Information Services is a leader in research databases and discovery services, supporting libraries, academic institutions, and healthcare providers.

Principal Software Engineer | Full-time

- Led the design and long-term maintenance of a reusable front-end component library, improving consistency and scalability across multiple products.
- Established documentation standards and authored comprehensive technical guides, improving onboarding and cross-team collaboration.
- Partnered with designers, product managers, and backend teams to align technical solutions with user and business goals.
- Mentored engineers in accessibility (WCAG standards), responsive design principles, and maintainable front-end practices.

Senior / Web User Interface Engineer | Full-time

- Improved application performance and maintainability through frontend architecture optimization and refactoring efforts.
- Conducted code reviews and collaborated closely with designers and engineers to deliver accessible, user-centered features.
- Supported ongoing feature development while maintaining high standards for quality, accessibility, and stability.

WAYFAIR | Boston, MA

04/2016 - 10/2016

Wayfair is a leading online retailer in home furnishings and décor, offering an extensive product selection across multiple brands globally.

Front End Engineer II

- Delivered scalable, maintainable features for five e-commerce platforms using PHP, JavaScript, HTML, and CSS.
- Enhanced site performance and reliability by implementing front-end best practices.

FREELANCE | Hendersonville, NC
